

11-10-16

Be aware of overhead wires when working near power lines.
Your life is on the line.

Never trim trees near electric lines! For your protection, and to prevent power outages, **CPS Energy** routinely trims tree limbs near our pole-to-pole high voltage power lines. If your tree(s) need to be trimmed away from high voltage power lines, call **210-353-2222**. If a tree needs to be trimmed away from the residential electric service line, schedule a free 'temporary disconnect' in advance to have the line moved out of the way. CPS Energy does not clear telephone or cable TV lines.
